IronHack | 2020

Cert. Geographic Info Systems
University of Washington | 2015

B.S. Environmental Science
Washington State University | 2013

LANGUAGES

English | Fluent
Spanish | Fluent

PROFILE

Web developer with a passion for problem-solving - I enjoy being challenged and how this work uses my full mental capacities. I'm very methodical and I **need** to write code that is not only functional but readable and well-organized. I understand the fundamentals of computer science and the internet and can intuit how packages and libraries are functioning. In my current role I found I can also intuit why other developers did what they did and that I have a knack for cleaning up code bases. I enjoy working on teams, collaborating with developers, and have experience with git/git workflows.

SKILLS

Algorithms and object-oriented programming ♦ Agile methodologies/team version control ♦ Problem-solving with docs ♦ Async operations/HTTP requests ♦ Configuring dev environment ♦ Writing semantic code using industry conventions ♦ Building modular components/scalable apps using best practices

EXPERIENCE

FRONT END WEB DEVELOPER

GLOBAL STRATEGIES INTERNATIONAL | BEND, OR | DECEMBER 2020 - PRESENT
Build new features and maintain two proprietary Flask apps. Use jQuery and AWS JavaScript SDK for sending requests, Dropzone.js for file uploads and Tableau JavaScript API to visualize data.
- Cleaned codebase and organized apps with very little specific directions.

NETWORK DESIGNER

ATCO COMMUNICATION SERVICES | PORTLAND, OR | APRIL 2019 - JUNE 2020
Python scripting to automate and standardize GIS queries/data inserts/data processing. Estimated project costs and allocated resources to prioritize projects of highly-variable scopes and timelines.
- Rapidly oriented myself within the team and learned my role, began managing my own territory two months sooner than anticipated.

INTERESTS

Human connection, playing music, motor/bi-cycles, snowboarding, art, travel, basketball, the great outdoors, and spiritual growth.
